Dear Terri,

I can't thank you and your crew enough for the wonderful wild game dinner event you put together for our ABB Users Group October 24th at the National Shooting Complex. Being a highly detailed meeting planner, it was a pleasure to work with a professional group like yours with the same attention to detail. I knew from our first conversation that we would work well together. Not only did you all blow away my guest and me but also I think it was culture shock for the employees of the gun club. I know you didn't accomplish this all by yourself and you are very fortunate to have such a great staff to work with.

Kim Snipes was always on the ball and responsive in returning my calls and attending to my request. She also did a great job on following up on the branding irons I requested as amenities for our quests. She's a keeper.

I'd like to steal Jorge Serna from you. He certainly went above and beyond in handling our last minute beverage glitch with no added stress to me during a stressful four days of responsibility for several events.

Tye & his crew did a great job of turning a beer and chili pavilion into an enchanting starry atmosphere.

Banquet manager, Jim Peconaga, Luis & Eddie Gonzales were impeccable in presentation.

Special thanks to Chef Richard Jimenez for accommodating me with new recipes and requests. The food and its' presentation was fabulous. The tasting presentation was invaluable to me so that all items on the menu were served with my expectations met.

I could go on and on. Your special detail to lighting, decorations & tablecloths were really perfect. I know all those involved couldn't have accomplished this degree of perfection without a top quality leader like you.
